

The 11th Nagoya International Mathematics Conference

Topology and Analysis on Foliations

The main theme is a study of foliations from topological and analytic viewpoints.

We also emphasize the interactions and connections of foliations to other fields such as ergodic theory, dynamical systems, characteristic classes in a broad sense, global analysis and noncommutative geometry.

Invited Speakers

Kiyonori Gomi (Shinshu University)
Steven Hurder (University of Illinois at Chicago)
Ryoji Kasagawa (Nihon University)
Naoya Miyazaki (Keio University)
Ryszard Nest (Københavns Universitet)
Shin-ichi Oguni (Ehime University)
Catherine Oikonomides (University of Tokyo)
Paolo Piazza (Sapienza Università di Roma)
Thomas Schick (Georg-August-Universität Göttingen)
Tatsuru Takakura (Chuo University)
Tatsuya Tate (Nagoya University)
Makoto Yamashita (Ochanomizu University)

Organizing Committee

Hitoshi Moriyoshi (Nagoya University)
Toshikazu Natsume (Nagoya Institute of Technology)
